WORK EXPERIENCE

Fun J. Software Developent Corp.
Front-End Developer | April 2024 - Present

- Develop and maintain existing/new projects (React Web Admins, Vue Web app, H5 app, and Landing page) using React JS, Vue JS, Javascript, Typescript, Redux, HTML, CSS, SASS, Ant Design, Rest API's, WebSocket, Jenkins, etc.
- Migrate old platforms to new, create new features, and fix bugs (local, test/staging, and production). Build applications for production on different platforms.
- Collaborate with back-end engineers, project managers, and UI/UX designers.

Philtech Info Services Inc.
Front-End Developer | June 2023 - April 2024

- Develop, maintain, and test existing/new projects using Next JS, Nuxt JS, React JS, Vue JS, Typescript, Javascript, Redux, Redux Toolkit, Tailwind, HTML, CSS.
- Create the file structure of the project. Create reusable React components, and hooks, integrate RestAPIs, configure Redux/thunk, Next config, Middleware, etc.
- Share my knowledge with my co-developers about best practices in coding and how to write readable, maintainable, and optimized code.
- Review co-developers code and assist them if they have blockers/challenges.
- Created a chart on how the data will flow from API to Global State(Redux) and different components of the project. Implemented most of the features and created almost all reusable components in our Next.JS project.

Fligno Software Philippines Inc.
Associate Software Engineer | March 2022 - June 2023

- Design, develop, and test new and existing projects using the latest front-end technologies(React, Javascript, Typescript, Redux, Zustand, React Hook Form, Tailwind, Material UI, CSS, SASS, HTML, JEST, etc). Apply best practice development patterns and follow design briefs, Continuous Integration/Development, and maintenance of code.
- Collaborate with back-end engineers, project managers, and UI/UX designers to transform creative concepts into production realities for clients and stakeholders.
- Read confluence documentation about the project app features/requirements and add estimates.
- Create own mock-up and discuss it with the client(if the feature is not available on Figma).
- Responsible for code review of co-developer(Front-end) to maintain code quality standards and also the approver of Pull requests.
- Participate in daily standup meetings and present/demo the progress and update every end of milestone/sprint to our clients (99% of our clients here are from Australia).
- Teach other developers a specific topic/language that is given to you. (Upskilling program by FLIGNO).

Directories Philippines Corporation (DPC)
Web Designer & Developer | November 2019 - February 2022

- Create and design a new website using the CMS platform(WIX) based on clients' branding and defined site objectives.
- Customize and revise existing websites using Powersite(CMS), HTML, CSS, SASS, Javascript, and JQuery.
- Edit/Enhance provided assets using Photoshop.
- Worked with the TechOps team supervisor for the creation of the Bel-Air Vehicle Registration System as a Developer I wrote a thousand lines of Javascript code. I implemented CRUD functionality and data filtering.

One Hundred Services Inc.
Powersite/Web Designer | August 2019 - November 2019

Customize and revise existing websites using Powersite(CMS), HTML, CSS, SASS, Javascript, and JQuery. This is a sister company of Directories Philippines Corporation. My job description/responsibility is the same as in DPC.
